Subsection 2.1.3, add new paragraph at end of subsection:

“Earlier specifications (references [B2] and [B3]) of the TM Space Data Link Protocol and TC Space Data Link Protocol did not use the concept of an LDP, and the Application Process Identifier was specified as identifying the on-board sending or receiving application process. This recommended standard includes this earlier specification of the use of the field. However, in order to cover the cases where an APID Qualifier is used, the term Path ID is used in many instances where the earlier specifications referred to the APID.”
